#### P.4 SOCIAL STUDIES CLASSWORK WEEK 3

### Air pressure

- It is also called atmospheric pressure.
- Air pressure is measured in Millibars (mb)
- Areas with high air pressure experience dry conditions while those with low pressure receive rainfall.
- The instrument used to measure air pressure is called a **barometer**.

### **Humidity**

- This is the amount of water vapour in the atmosphere.
- Humidity is measured using an instrument called **hygrometer**.

#### Diagram

#### **Activity**

- 1. Name the element of weather measured in millibars.
- 2. How is a barometer important at a weather station?
- 3. What is humidity?
- 4. Name the instrument used to measure water vapour in the atmosphere.
- 5. In which units is humidity measured?

# Tuesday

#### **TEMPERATURE**

- This is the degree of hotness or coldness of an area or object.
- Temperature is measured in degrees.

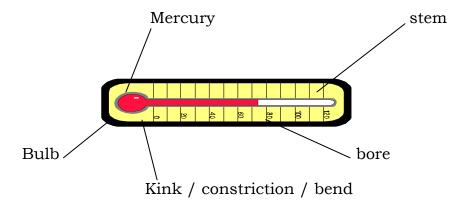

• It is measured using an instrument called a **thermometer**.

# **Types of thermometers**

### Clinical thermometer

- It is also called the doctor's thermometer.
- It is used in clinics and hospitals.

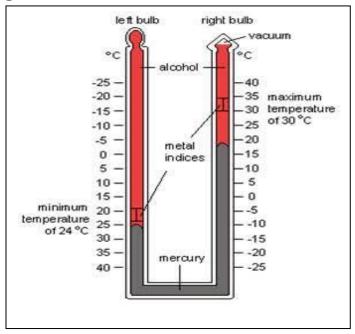

# Diagram

#### Six's thermometer

- It was invented by James Six, hence its name.
- It's also called the minimum and maximum thermometer.
- The <u>minimum</u> scale measures the <u>lowest</u> while the <u>maximum</u> scale measures the <u>highest</u> temperature

# Diagram:

**NB**: Mercury and alcohol are the liquids used in the thermometer but mercury is more commonly used.

## Why mercury is used

- It doesn't stick on the thermometer walls
- It is clear due to its colour
- It is more sensitive to heat than alcohol.

#### Scales used on the thermometer

- Celsius scale (centigrade) (°C)
- Fahrenheit scale (°F)

### **Activity**

- 1. What is temperature?
- 2. Name the units used for measuring humidity.
- 3. Which instrument is used to measure the highest and lowest temperature of the day?
- 4. Why is mercury commonly used in thermometers?
- 5. Name one type of scale used to measure temperature.

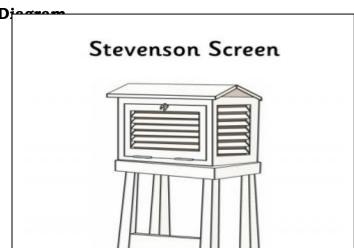

#### Wednesday

#### A weather station

This is where weather conditions are studied ad recorded.

#### Stevenson screen

- This is a wooden box in which delicate weather instruments at a weather station are kept.
- Its importance is to protect delicate weather instruments from damage.
- It is painted to reflect sun heat.
- It is lowered to allow air circulation within it.
- Its stands are made of metal because metals are long lasting.

#### Instruments found in a Stevenson screen

- Thermometer (S)
- Barometer
- Hygrometer
- Measuring cylinder of a rain gauge

### Activity

- 1. Name the special place where weather changes are recorded.
- 2. How is a Stevenson screen important at a weather station?
- 3. Why is a rain gauge not kept in a Stevenson screen?
- 4. Why is a Stevenson screen built with louvers?
- 5. Name two weather instruments kept in a Stevenson screen.

#### Thursday

#### HOW WEATHER AFFECTS PEOPLE'S ACTIVITIES

- Weather can influence people's activities in various ways such as farming.
- Too much sunshine / rainfall can destroy people's crops.
- Dressing can also be affected by weather for example, people in hot areas like Karamoja put on light clothes while those in cold areas put on heavy areas
- People carry umbrellas on sunny and rainy days.
- People who work in open areas are affected by sunshine and rainfall.
- People who live in dry areas wear light clothes while those in cold wear heavy clothes.
- Weather determines the types of crops to grow.

#### SEASONS AND CORRESPONDING ACTIVITIES

**Seasons** are periods of time in a year when the same weather conditions are experienced.

Seasons usually last for 3-4 months.

There are only **two** seasons experienced in our district .These are:

- Dry season
- Wet season

Some countries have more than two seasons e.g.

- Autum
- Spring
- Summer
- Winter

#### Activities farmers do in the different seasons.

# Dry season

- Harvesting ready crops.
- Drying yields
- Preparing / ploughing the land
- Seed storing
- Repairing machines

### Wet season

- Planting of crops
- Weeding
- Pruning
- Spraying

# Activity

- 1. State the activities done by farmers during;
  - a) Wet season
  - b) Dry season
- 2. Why is it necessary to harvest crops during the dry seasons?
- 3. Why is there need to have proper storage of harvests?
- 4. What is the use of a granary to the farmer?
