SAVING RESOURCES

A resource is anything people use to meet or satisfy their needs. Examples are: plants, food, soil / land, money, time, fuel, air, water, minerals and others. Resources are very important to people so they need to be saved to avoid wastage. There are several ways of saving resources for example money can be kept in the bank to avoid wastage and to be stolen, trees can be saved by planting more, water and by turning off taps when not in use, electricity by switching off lights during day time and using energy saving stoves, food by preparing enough which can be eaten and also by preserving some for future use. Budgeting our money and making shopping lists.
